

Sl. NO.	ITEM DESCRIPTION	IMAGE
1	<p>Perforated Metal Grid Ceiling : Supply of LD Square Make Metal False Ceiling tiles of 0.4mm thick GI sheets with 600mmx600mm size manufactured out of galvonised iron,and size of the tile can be customized as per the architect/designer requirement with a finish powder coated finish are formed in the grid to complete the job, perforation diameter of 1.5mm , the grid would be 15mm shilouted grid made of 0.4mm gi sheet ,and the grid would be hung to the true ceiling by using M6 Hook type anchor fastner , GI wire .Powder coating colour:- Any RAL color of your choice.</p>	
2	<p>SS Perforated Metal Grid Ceiling : Supply Of LD Square Make Metal False Ceiling tiles of 0.6mm thick SS sheets with 600mmx600mm size manufactured out of SS 304 grade mattfinish formed in the grid to complete the job, perforation diameter of 1.5mm , the grid would be 15mm shilouted grid made of 0.6mm SS sheet ,and the grid would be hung to the true ceiling by using M6 Hook type anchor fastner , GI wire . Finish of the tile is SS 304 grade matt finish.</p>	
3	<p>Plain Metal Grid Ceiling :Supply Of LD Square Make Metal False Ceiling tiles of 0.4mm thick GI sheets with 600mmx600mm size manufactured out of precoated hot dipped galvonised iron,and light cut out tile would made of 0.6mm gi sheet with a finish powder coated finish are formed in the grid to complete the job , the grid would be 15mm shilouted grid made of 0.4mm gi sheet , the grid would be hung to the true ceiling through M6 hook type anchor fastner and gi wire , butterfly clip provided with every 800mm .Powder coating colour:- Any Color of your choice.</p>	
4	<p>SS Plain Metal Grid Ceiling :Supply Of LD Square Make Metal False Ceiling tiles of 0.6mm thick GI sheets with 600mmx600mm size manufactured out of SS 304 grade matfinish sheet metal are formed in the grid to complete the job , the grid would be 15mm shilouted grid made of 0.6mm SS sheet , the grid would be hung to the true ceiling through M6 hook type anchor fastner and gi wire , butterfly clip provided with every 800mm.Finish Of The Tile SS matt finish .</p>	
5	<p>Random Perforated Metal Grid Ceiling : Supply Of LD Square Make Metal False Ceiling tiles of 0.6mm thick GI sheets with random perforations,600mmx600mm size, with a finish powder coated tile with standard perforation of required dia OF SIZE 3MM, 5MM , 8MM 10MM AND 15 MM , 25MM in random direction to form pattenen as per architect design , diameter size and perforation pattern can be customized as per the architect requirement are formed in the 15mm silhouette grid to complete the job.grid would be hung to the true ceiling by using M6 hook type anchor fastner , gi wire , and butterfly clip support would be provided at every 800mm lenght . material would be powder coated finish of approved color Of Any Color of your choice.</p>	

6	<p>Jala Ceiling : Supply of LD Square Make Metal False Ceiling of jala ceiling made up of 0.8mm CRCA of size 561X1122mm , sizes can be customized as per the requirement with hole dia of size 63mm and with embossing diameter of 73mm. The tile would be provided with Anodizing finish of any colour of thickness 70-80 microns. The tile would be hung to the the true ceiling by using U type mainchannel made upo of 0.8mm gi section and slotted channle made of 0.8mm gi section and this two carroer to tob hung to true ceiling by using M6 Hiltimate anchorfastner , nut and washer and M6 gi threaded rod. Powder coating color : Any color of your choice.</p>	
7	<p>Jala Ceiling : Supply of LD Square Make Matal False Ceiling of jala ceiling made up of 1.2mm aluminium sheet of size 600x600mm , sizes can be customized as per the requirement with hole dia of size 63mm and with embossing diameter of 73mm. The tile would be provided with Anodizing finish of any color of thickness 70-80 microns. The tile would be hung to the the true ceiling by using U type mainchannel made upo of 0.8mm gi section and slotted channle made of 0.8mm gi section and this two carroer to tob hung to true ceiling by using M6 Hiltimate anchorfastner , nut and washer and M6 gi threaded rod. Finish : Steel Finish</p>	
8	<p>Emboring Ceiling: Supply Of LD Square Make Metal False Ceiling Emboring tile made up of 0.8mm thick in silhouetted grid system. The emboring circle diameter of 80mm outer dia and 70mm inner dia of emboring thickness 2mm. The tile would be layed on 15mm shilouted grid system, the grid would be made up of 0.4mm GI sheet of size 8ft, 4ft and 2ft with W wall angle around the wall. The grid would be hung to the true ceiling by using M6 hook type anchor fasteners, GI wire, washer and nut. Powder coating color: Any RAL color of your choice .</p>	
9	<p>Round Ceiling:- Supply of LD Square Make Metal False Ceiling of round ceiling made of 1.2mm aluminum of size 600x600mm size of the inside circle would be 100mm and outside circle dia would be 70mm with height of 50mm , number of circles in one tile is 36 all the sizes can be customized as per the requirement and tile would be providee with powder coated finish of any color with powder coated thickness of 70-80 microns . The tile would be formed to place inside the 15mm shillouted grid and grid would be hung to the true ceiling by usin M6 hook type anchor fastner , GI wir , butterfly clip .Powder coating color:Any color of your choice.</p>	
10	<p>Perforated Metal Grid Ceiling : Supply of LD Square Make Metal False Ceiling tiles of 0.8mm thick GI sheets with 600mmx600mm size manufactured out of galvonised iron,and size of the tile can be customized as per the architect/designer requirement with a finish powder coated finish are formed in the grid to complete the job, perforation cut out size of 90mm , the grid would be 15mm shilouted grid made of 0.4mm gi sheet ,and the grid would be hung to the true ceiling by using M6 Hook type anchor fastner , GI wire .Powder coating colour:- Any color of your choice.</p>
